Open Source Promotes the Global AI Innovation

Jianmin Wang
School of Software, Tsinghua University
CAST UN Consultative Committee on Open Source Innovation

July 2026

Village Life Nurturing my Open-Source Spirit

Mutual help among our village neighbors ran through my childhood and nurtured my open-source spirit.

Open source is an effective means of advancing technique innovation, facilitating inclusive access and ensuring explainable transparency.

Childhood

University

Career

My Open-Source Journey

Promote Open-Source

2003

invited open-source practitioners into Tsinghua classrooms

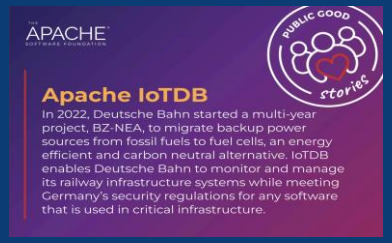

Apache IoTDB

2011 Initialized

2018 Incubated

2020 Graduated as TLP

2024

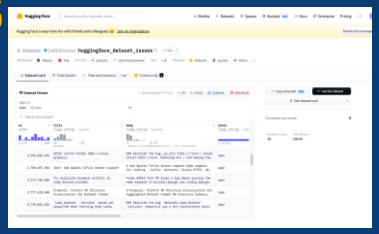

Apache IoTDB application at Deutsche Bahn was selected as Public Good story in the 2024 Apache Software Foundation Annual Report

TsFile

2024 Graduated &TLP

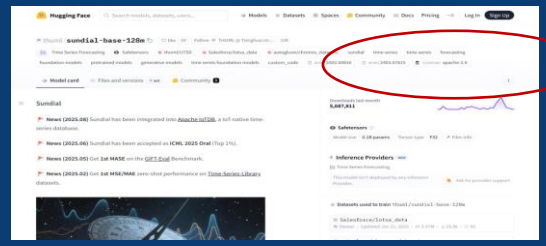

2026

Apache TsFile was accepted by Hugging Face as a supported dataset format for time series

Timer

2024 Initiate

"Sundial" was downloaded over 5 million times on Hugging Face within 1 month

China Open-Source User Community **7600+**

Github Starts **20000+**

Apache Active 2025 **Top3**

China ’s Open-Source Status: Scale of Participants

China’s Open-Source Status: Contribution & Project Impact

World Project OpenRank Influence Heat Map

Open Source Project OpenRank Influence by Country

1	United States	1.60M	▲ +23.09K
2	China	514.22K	▲ +75.68K
3	Netherlands	49.75K	▲ +1.60K
4	Germany	29.91K	▲ +4.09K
5	United Kingdom	28.22K	▲ +3.45K
6	Canada	20.20K	▲ +8.72K
7	Belgium	16.68K	▲ +3.28K
8	Russia	16.51K	▲ +2.24K
9	France	12.85K	▲ +2.06K

Open Source Project OpenRank Influence by Company

1	Microsoft	239.27K	▼ -17.98K
2	Huawei	146.08K	▲ +43.79K
3	Google	92.77K	▼ -4.35K
4	Amazon	57.56K	▼ -10.11K
5	Meta	57.32K	▲ +623.39
6	RedHat	43.85K	▲ +1.12K
7	NVIDIA	42.92K	▲ +11.98K
8	Elastic	42.53K	▲ +6.64K
9	Grafana Labs	35.05K	▲ +583.3
10	Alibaba	31.13K	▼ -934.11

Open AI in China: The Rise of Open-Weight Models Over Time

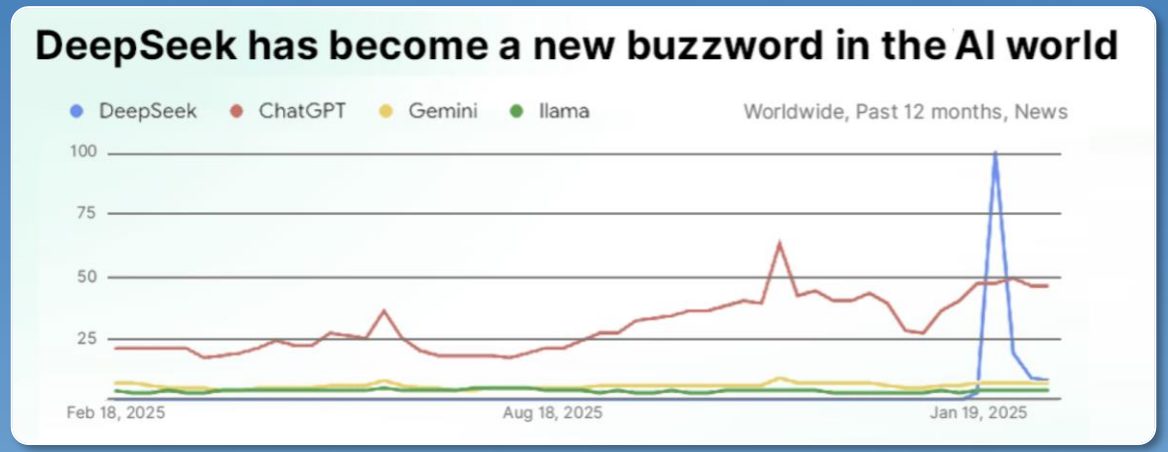

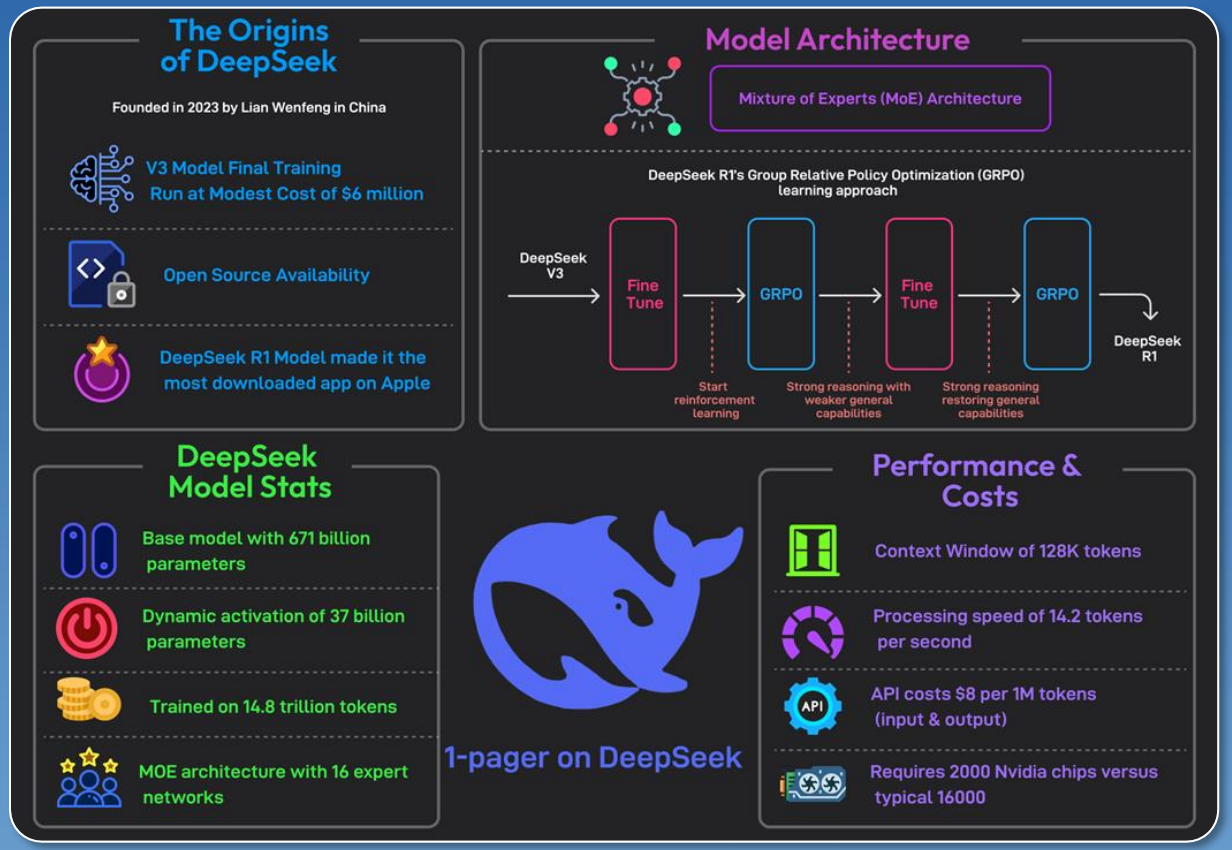

China’s Open Source AI Case: DeepSeek

This is a timeline of DeepSeek, a Chinese artificial intelligence company founded in 2023, specializing in the development of open-source large language models (LLMs).

”We insist on open-sourcing our full model lineup to lower the barrier for small and medium enterprises and research teams worldwide to access state-of-the-art large models, and bridge the digital gap”

China’s Open-Source AI Case： Z.AI

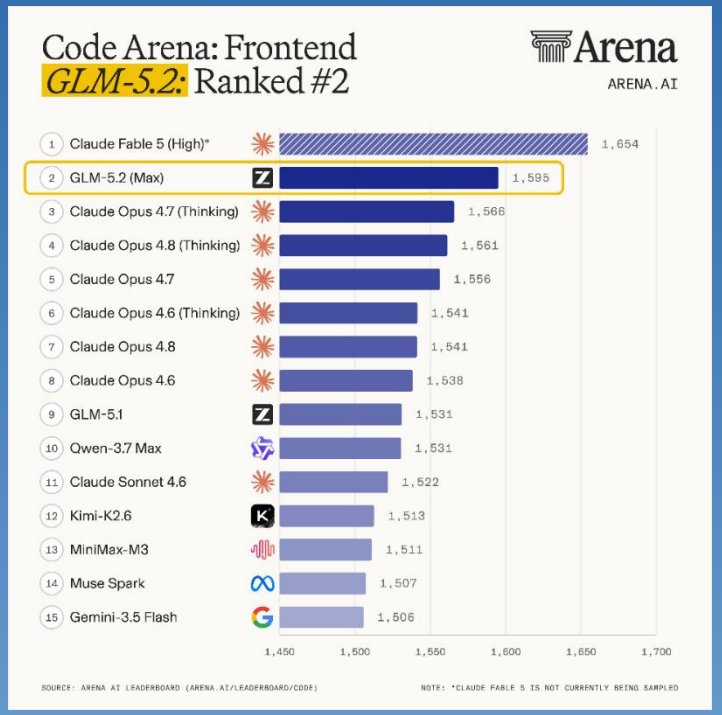

In 2019, Tang Jie founded Zhipu AI with the team from Tsinghua’s KEG Laboratory. From its inception, the company has upheld open sourcing: nearly every generation of its models, from GLM-130B to GLM-5.2, has been released freely to global developers. Today, Zhipu AI’s products serve over 70 countries and regions worldwide, with its open-source models recording a total of 45 million global downloads.

»

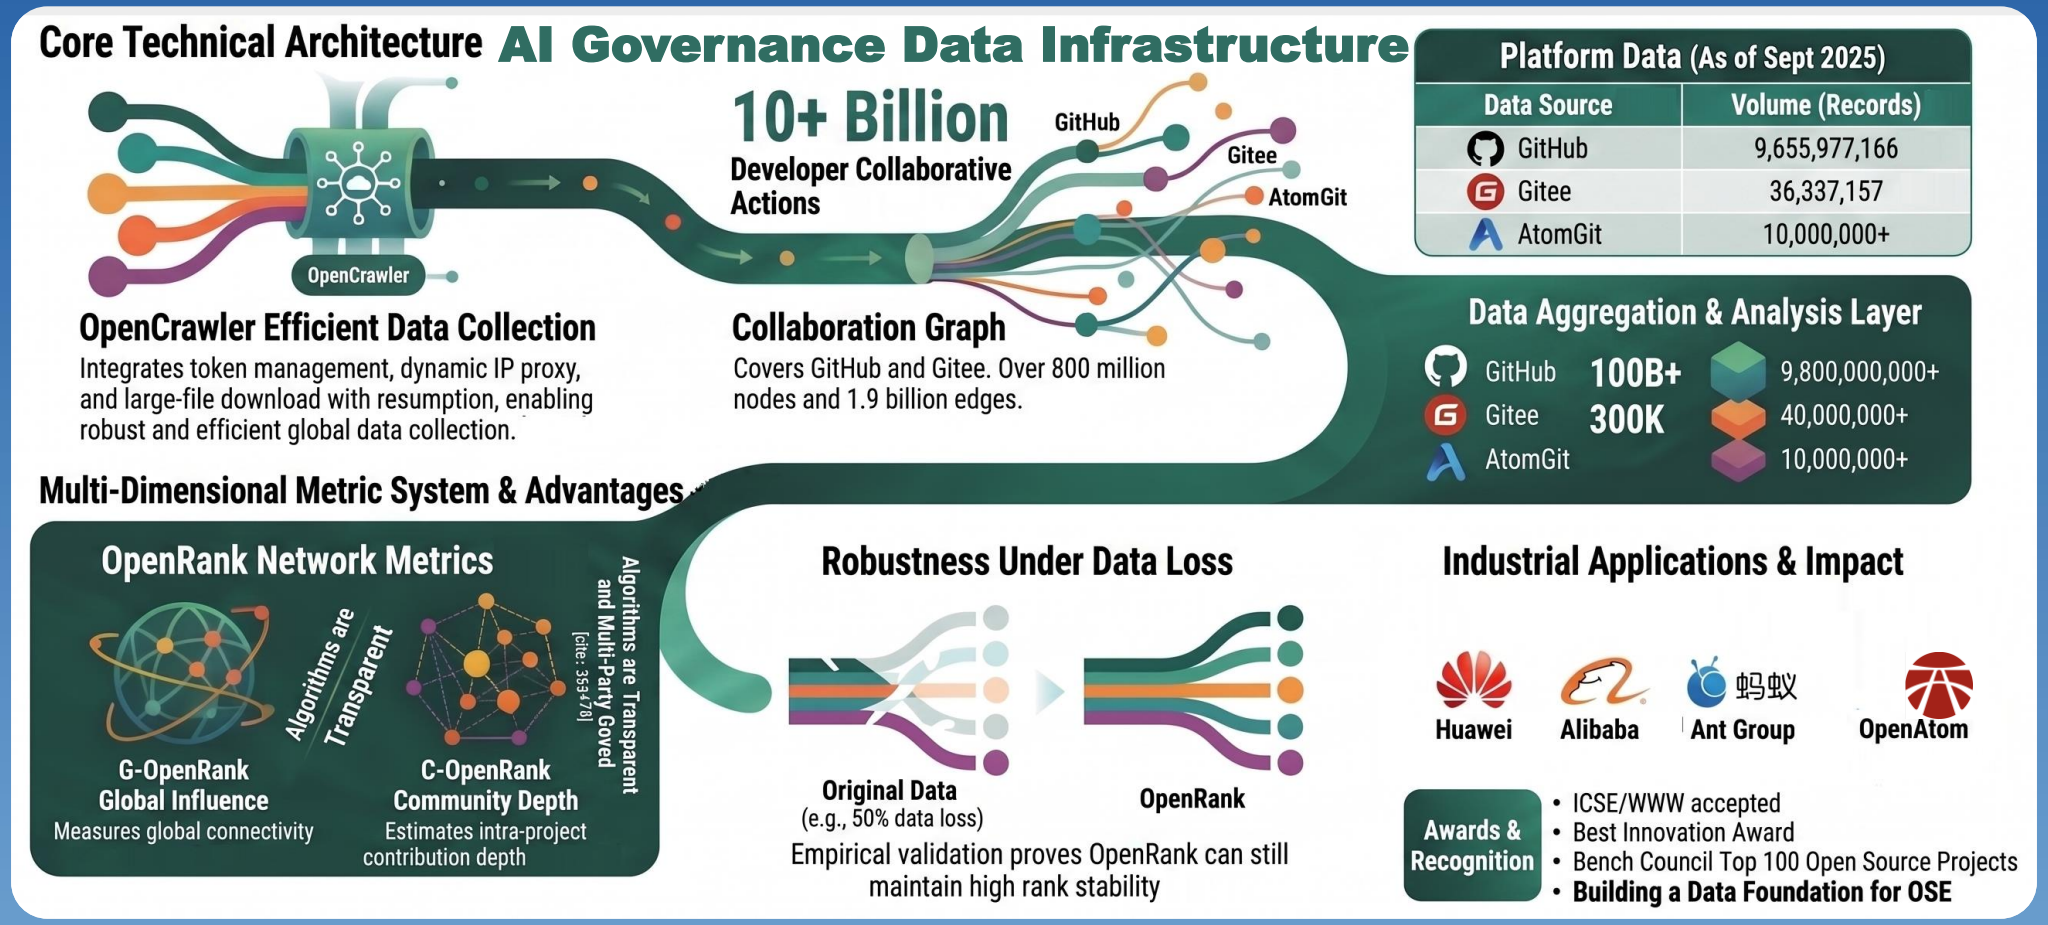

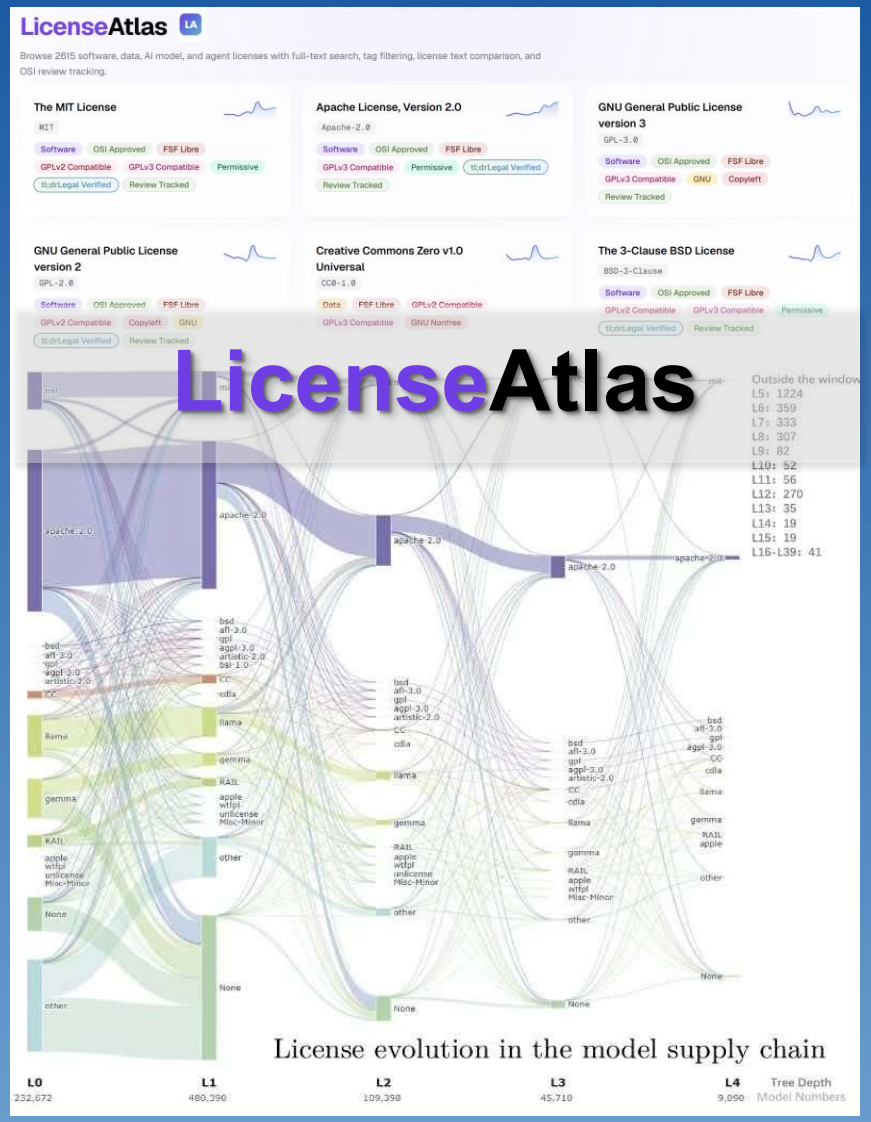

GLM-5.2 secured second place globally on Code Arena（ Feb 2026）

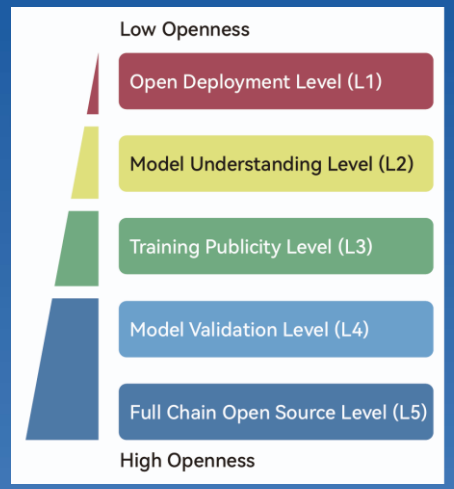

China’s Open Source AI Case: AI Governance Data Infra

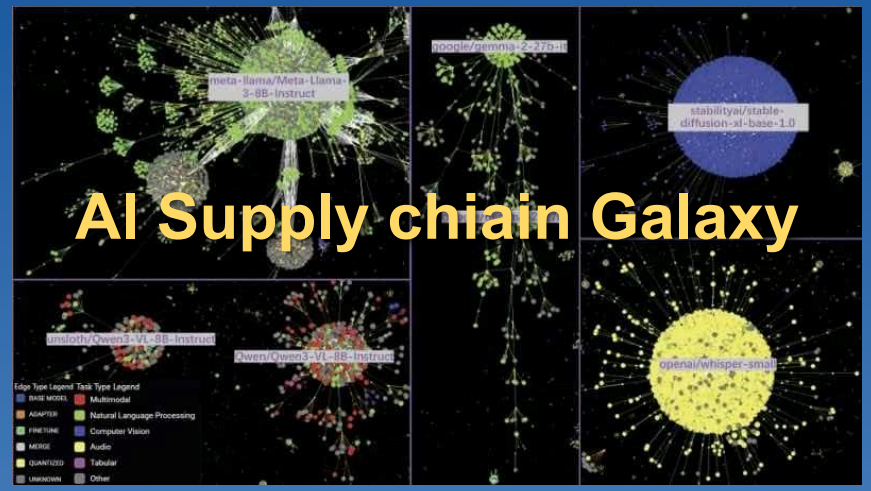

OpenDigger, a data infrastructure platform that assesses the health, transparency and governance maturity of global open-source and AI ecosystems. Officially adopted by China’s Ministry of Industry and Information Technology, the platform was deployed widely and used by Huawei, Alibaba, Ant Group and OpenAtom Foundation.

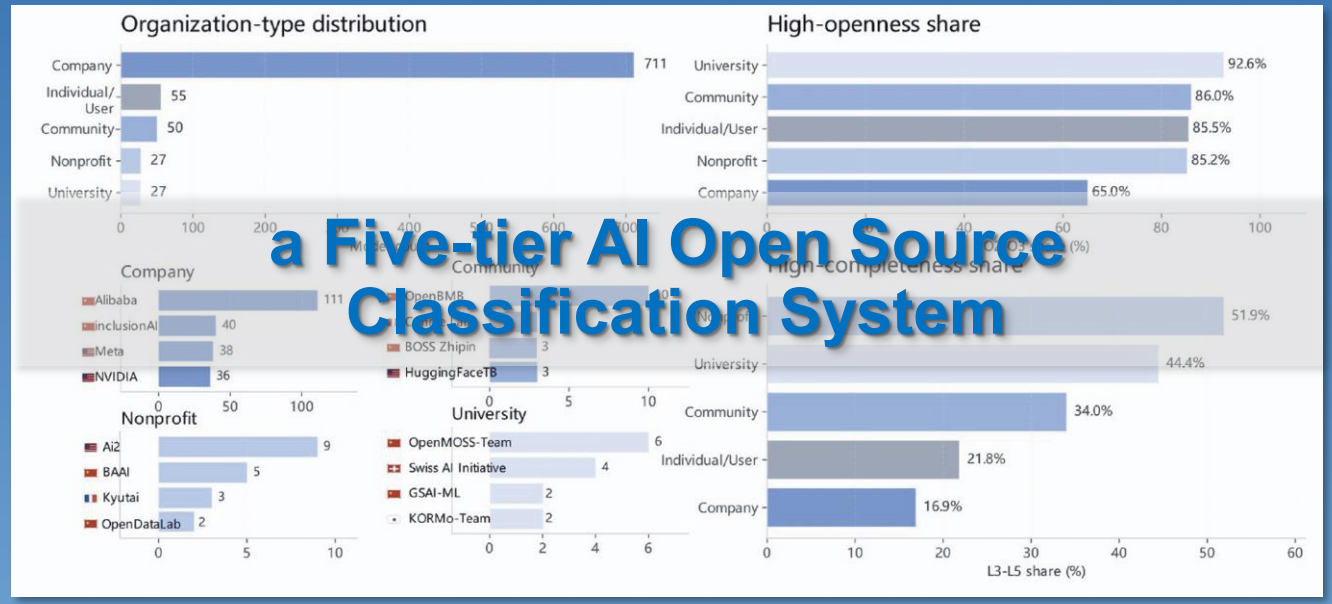

China’s Open Source AI Case: AI Governance Toolsets

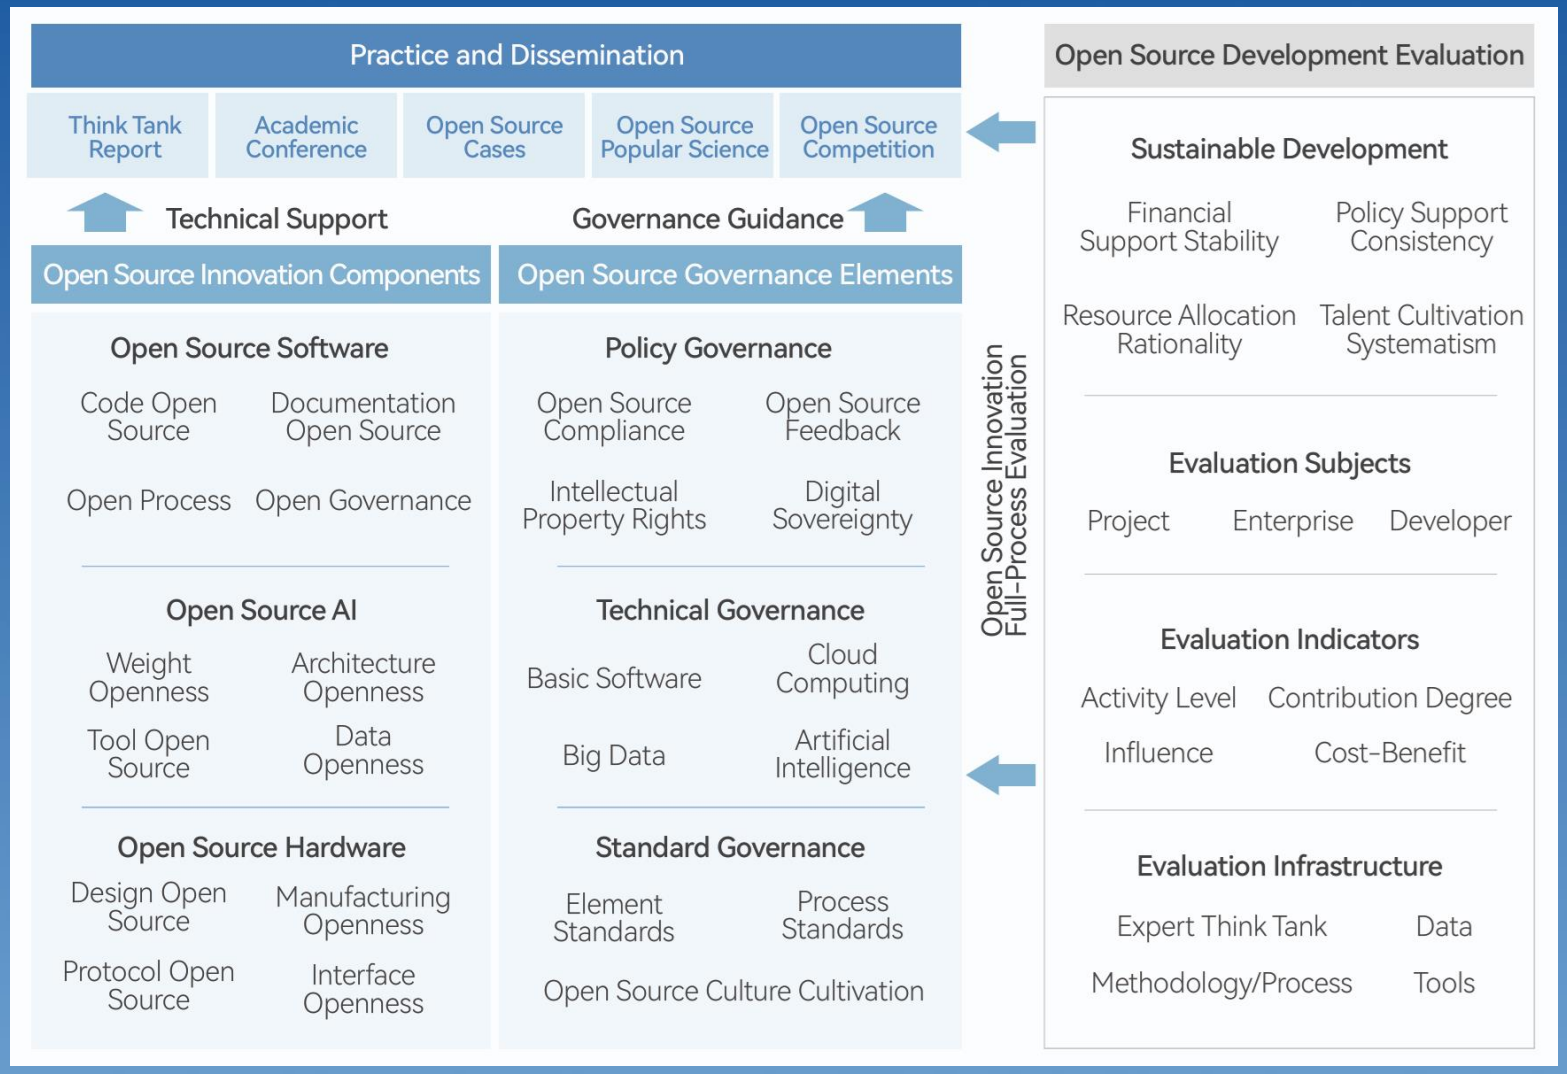

CAST UN Consultative Committee on Open Source and Innovation（CCOSI)

CCOSI was established on September 10, 2025.

CAST UN Consultative Committee on Open Source and Innovation (CCOSI)

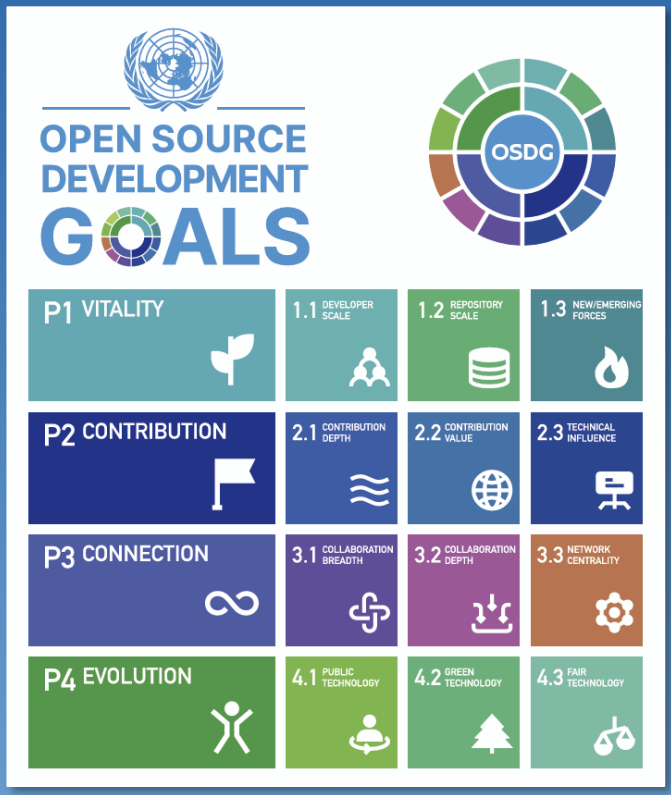

The 2026 Global Open Source Development Report (GOSD-26)

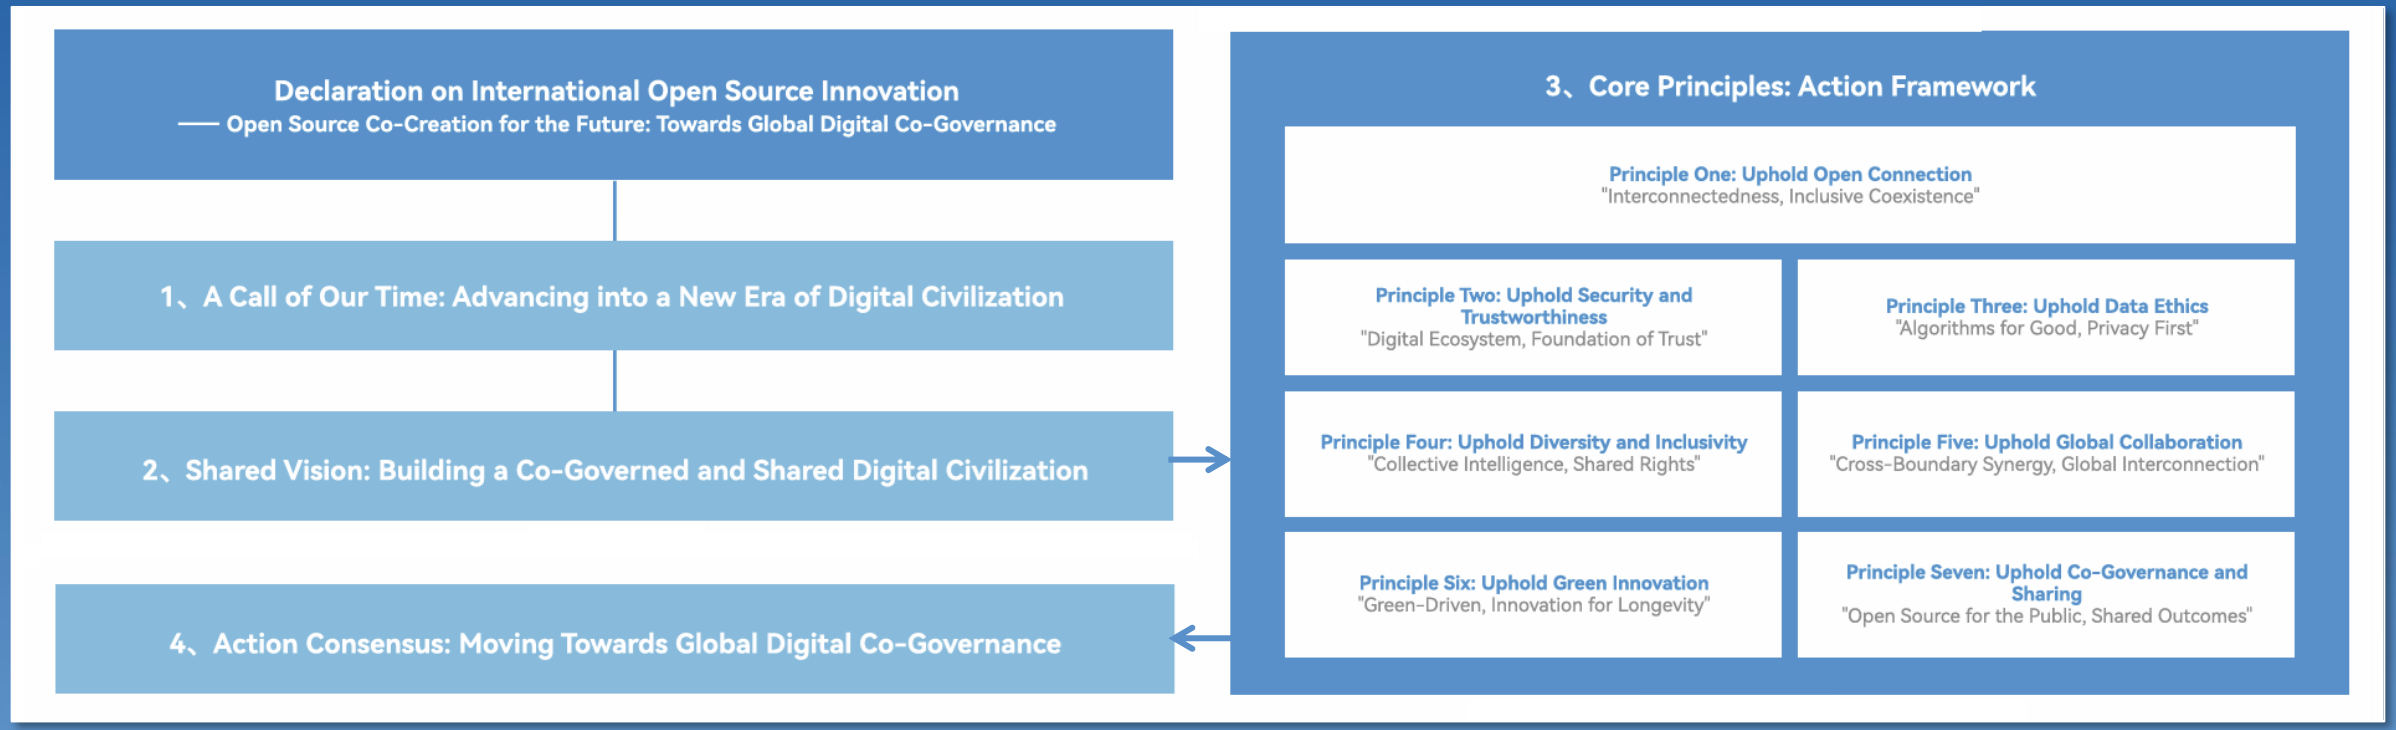

The *GOSD 2026* integrates the principles of AI for Good, systematically analyzing how open-source AI ecosystems advance the UN Sustainable Development Goals through inclusive, equitable, and responsible innovation.

Commit to openness and collaboration, and jointly build an inclusive, equitable, and unified global open-source AI ecosystem.
